MASSILLON, OHIO, THURSDAY, OCTOBER 4, 1906

FAGIN'S FALL FROM OFFICE

Reasons Given For His Removal by President Rossevelt.

WAS TOO ACTIVE IN POLITICS

Former Auditor of Hamilton County Slated to Succeed Fagin - Color Line Causes a profike at Columbus. Reorganization of Athens Hospital and Other News Incident to Ohio.

Washington, Cet. 3. - Reasons for the removal of Vivian J. Fagin of Cincinnati as United States marshal for the southern district of Ohio by order of the president are to be found in a report made to the president by the gating charges that Fagin took too active a part in politics. The removal of B. F. O'Neal as marshal of the western district of Louisiana was or- field reformatory. dered on the ground of unfitness.

A report on Fagin's case to the president by Attorney General Moody was made public. The report was in the form of a communication from Henry F. Greene of the civil service commission, which says in part: "It | appears from the evidence that Mr. Fagin until recently has been an active ally of the Republican organization of the city of Cincinnati, commonly known as the 'Cox Machine.' All of the witnesses against Mr. Fagin whose testimony is at all material in this investigation have been also active supporters of this organization. Fagin apparently declared war on the Cox organization, or on its leaders, Cox, Hynicka, Herrman and others. Thereupon a very bitter state of feeling developed between the leaders of the organization, and Mr. Fagin and those who testified against Mr. Fagin probably were induced so to do because of their being supporters * the regular organization. It can not be denied that many of these witnesses are individuals whose testimony would be received in any court with caution, and according to Mr. Fagin's statement they are almost without exception a lot of professional criminals or aiders, abettors and supporters of professional criminals. Nevertheless there are certain facts in this case which do not depend in the least on the testimony of any one of the enemies of Mr. Fagin and which, in the judgment of the commission, indicate past violations of section 11 of the civil service act by him which are too remote in time to be punished by the to call for the removal of Mr. Fagin

from office." The testimony given before Greene by Mr. Gardner, chief deputy for Fagin, apparently calls for disciplinary action on the part of the department. Gardner states that Fagin not only was "in the habit of collecting money from all of the men in his office for political purposes, but also that he was in the habit of forcing them, or at least of forcing Gardner to divide his salary with him, Gardner getting \$100 a month and Fagin \$50. If Gardner's story, which has not been submitted to Mr. Fagin for contradiction, is true, a serious offense is disclosed. If not true, the action of Mr. Gardner certainly calls for his removal."

Cincinnati, O., Oct. 3. - Eugene L. Lewis, former auditor of Hamilton county, is said to be the man selected to succeed Vivian J. Fagin as United States marshal. Lewis has an immense following here, and is a member of nearly every lodge and organization to which he is eligible.

Race Feeling Causes Strike. Columbus, O., Oct 3.—The color line was sharply drawn at the Wege marble works by 70 white men, who quit work because of the employment of negroes, leaving 40 at work. The "going out" was perfectly orderly, but without notice to the management. The firm says that being in great need of rubbers, and unable to secure others, the firm heard of some colored men in Tennessee who were experienced in rubbing stone and brought them here. They arrived Monday and went to work Tuesday. The white

and the whole thing was a surprise. Drake Case Not Decided. Columbus, O., Oct. 3.—The supreme court did not hand down a decision on the validity of the Drake probe of Cincinnati, which it is expected will soon be decided. The case is in the hands of the court, but it is impossible to tell when it will be decided. By action of the supreme court in refusing : Libby, McNeill & Libby were adeither to dismiss or advance the case fare street railway project in Cleveland the litigation will hold the experiment in abeyance indefinitely.

men promptly laid down their tools

and walked out. The firm said no

notice of their intention was given,

White Divorce Case. Cleveland, O., Oct. 3 .-- Judge Phillips of the common pleas court granted a divorce to Mrs. W. J. White, wife of the millionaire president of the American Chicle company, otherwise known as the chewing gum trust. Mrs. White charged her husband with de-

Died in Alaska, Columbus, O., Oct. 3.-Fred D. Kel-

sey, formerly of Columbus but lately of Kodeak, Alaska, died in that city Sept. 4, according to information received here. Kelsey was a well known man in the section of Alaska in which pied there the position of United States commissioner, in which capacity he was serving at the time of his death. He was a son of the late Rev. L. D. and Mary Kelsey, a Presbyterian minister. He was married in Columbus Sept. 4, 1893, to Miss Minnie Ackley, and four children and the widow survive him. Mrs. Kelsey and children are en route from Kodeak to Columbus.

Decided Against Lingafelter. Newark, O., Oct. 3.-Worn and weary from the strain of months since the collapse of the Newark Savings bank and the Homestead Building association, Cashier James F. Lingafelter was hardly able to withstand the shock of the announcement of the action of the supreme court in the case of his son, Robert, who was convicted civil service commission after investi- of forgery. The court refused to allow the defense to file a petition in error, which means that young Lingafelter must at once begin to serve his indeterminate sentence in the Mans-

Athens Trustee Resigned. Columbus, O., Oct. 3.—In response to the demand of the governor, John Kaiser of Marietta sent in his resignation as trustee of the Athens state hospital. W. H. Williams of Columbus was reported by Dr. Wissinger. his physician, to be in a serious condition. As soon as he recovers sufficiently to do so he will tender his resignation to the governor on the Piketon, whose resignation also was requested.

Circus Animals Cremated. Geneva, O. Oct. 3.—Cummins' Wild West show, owned by Walter L. Main, was destroyed by fire in winter quarters here. One man, an employe, was burned to a crisp. All the animals except four elephants and two horses that were in the building were consumed by the flames. The loss will be about \$40,000, with no insurance. The fire is supposed to have started from a lighted cigaret or a cigar.

Miscreant Stoned Conductor. Springfield, O., Oct. 3 .- S. E. Green, mortorman on the D., S. & H., is lying unconscious at Midway, O. While making a trip from this city to Dayton he was struck back of the left ear by a stone thrown by an unknown man. who was put off the car for refusing to pay his fare. The stone inflicted an ugly scalp wound and caused concusion of the brain. His assailant has not been arrested.

Sawmill Accident.

ball, 20, met-a horrible death Spring Mountain, 10 miles north of here. He was a slab boy in a sawmill, and one of the huge pieces of lumber suddenly swung about, struck him and hurled him against the revolving saw. His right leg was cut off close to the body and in 15 minutes the young man bled to death.

Accuse Son of Matricide. Wellston, O.: Oct. 3 .- New features of the murderous assault upon Mrs. John Steele near her home at Leo are coming to light. Merrill, 25, married and having one child, was arrested charged with the assault on his mother. The son had his preliminary trial before Mayor Motz of Jackson. and was bound over to the grand jury in default of bond.

Big Flow of Gas.

Mansfield, O., Oct. 3.—Another gas well was struck by the Logan Natural Gas company on the Burneson farm, two miles south of Mansfield, with a capacity of 2,000,000 cubic feet daily. It is much stronger than the well struck on the same farm a couple of months ago. Other wells are to be put down in this vicinity as rapidly as possible.

Leaped Into River. Cincinnati, O., Oct. 3.—An unknown white man, fairly well dressed, deliberately jumped from a skiff into the Ohio river and was drowned. The body was swept away by the swollen stream. A coat and hat were found in the boat, but all marks that might have led to his identity had been obliterated.

Old Soldier Suicided,

Dayton, O., Oct. 3.-John W. O'Reilly, an octogenarian, committed suicide in a lavatory at the soldiers' home by cutting his throat with a pen knife. The gash extended from ear to ear and the veteran bled to death on the floor. He was a member of company C, Ohio infantry, in the civil war.

Packers Fined.

Chicago, Oct. 3.-The Omaha Packing company, Armour & Company and judged guilty of selling shortweight involving the validity of the 3-cent lard and a fine of \$25 was imposed on each firm by Judge Sheldon. The packers through their attorney, Ralph Crews, contended that there was no violation of the law so long as the lard and its package equalled the weight of lard they purported to sell.

President Will Not Stump. Washington, Oct. 3. - President Roosevelt announced to some of his callers that he will not "take the stump" in behalf of the candidacy of Charles E. Haghes for governor of ly submitted to the commission in a New York.

CABINET WILL HAVE A CHANGE

he lived, having for some time occu- Moody and Shaw Are to Step Out During the Winter.

MAGOON IS SLATED FOR CUBA

President Roosevelt Announces That He Has No Annexation Design on Cuba-Postponement of His Trip to Panama on Account of the Cuban Imbroglio Is Probable.

Washington, Oct. 3. - Two retirements from the president's cabinet are slated for this winter They are Attorney General Moody, whose resignation will become effective about Dec. 1, and Secretary of Treasury Shaw, who will retire in February. For one of the vacancies created the president will nominate George V. L. Meyer, United States ambassador to Russia, but for the other he is not yet ready to announce a successor. Mr. Roosevelt urged Moody to remain in the cabinet, but the latter, because of business arrangements, finds it impossible to do so. He also would like to have Secretary Bonaparte take Moody's place when the latter retires, but the former prefers the position at Metcalf of the department of comground of ill health. No response has | merce and labor take one of the posibeen received from John W. Gregg of | tions to be made vacant, but he also expressed a preference to remain where he is.

It seems to be well scitled that former Governor Charles E. Magoon of ernor of the provisional government pine commission and vice governor of home at Bayamo, Santiago province. the island, than he can the services of Governor Winthrop for the several months during which he expects the provisional governorship in Cuba will [continue. Magoon is anxious to go to Cuba, and his selection for the place is expected to be announced soon. The to Washington in two weeks.

The Panama Trip. The president considers the possi-Panama next month because of conditions in Cuba. He does not think at this time, however, that there is any likelihood of conditions arising which will prevent his going to Panama to make the tour of inspection he announced some time ago. Should any decided evidences of unrest in Cuba make themselves apparent as a result of the occupation by the United States and disarmament of the revolutionists, the president expressed the intention of abandoning the trip to Panama this fall, in which case it will be made after

congress adjourns next spring. The president freely discussed with his cabinet and individual callers, cabinet and with individual callers, among whom were Senators Knox and Foraker, the present situation in Cuba and its temporary occupation by United States forces. The matter was talked over at the cabinet meeting, but no definite announcement of the result of the deliberations was given out. The president related to the cabinet and to callers with whom he talked that the action taken by the administration was destined solely for the benefit of the people of the island, with a view to the complete restoration of order there and the protection of all interests. He declared that he had no such motive in view as the possible annexation of the island by the United States. What he wants now is that the Cubaus be given another extraordinary conditions arise no extra session of congress will be called the president considers he has ample

authority to proceed in the matter. Vacancy on Supreme Bench. Washington, Oct. 3.—The president will not make an appointment to fill the vacancy on the bench of the supreme court of the United States until the reassembling of congress in ritorial conventions in Honolulu. The December. Secretary Taft has been question of accepting or declining units the first white man to be named der consideration some time. The president stated that he would gladly appoint Attorney General Moody, who is soon to retire from the cabinet, to the vacancy, but realizes that objection would follow because Massachusetts is already represented on the supreme bench in the person of Justice Holmes.

Chinese Contracts. Washington, Oct. 3.-Theodore P. Shonts, chairman of the Panama canal commission, returned to Washington after an absence of several weeks in New York. He said he hoped to make the sward of the contract for the Chinese laborers on the proposals recent-

few days. None of the proposals submitted complied exactly with the that specifications, but Shonts said that the differences between the proposals and the requirements offer little trouble to straighten out.

PATHETIC SCENE

At the Palace When Palma Quit It For Private Life.

Havana, Oct. 3.-President Palma's departure with his family from the palace was a pathetic scene. Members of the cabinet and a few intimate triends hade him farewell in his private apartments.

The Palma party consisted of Mr. Palma, Mrs. Palma, Jose Palma and his American wife and child; Tomas Estrada Palma, Jr., the eldest daughter, Candita Palma, the two younger boys and one girl. In spite of his age. the difficulties which he encountered in governing Cuba during the last four years and the special trials of the last months, Mr. Palma did not appear to be broken in health.

All the family were visibly affected over the circumstances surrounding their departure in a little over four months after Palma was inaugurated for a second term under such appar-

ently happy auspices. There were not more than a score of persons outside the palace when the former president left it, and there was very little cheering at the wharf when the family embarked, though several tugs, steamers and government launches gave a parting salute with their whistles.

On arriving at Regla, while passing from the tug to the train, the ex-president was greeted with hearty cheers the head of the navy department. and cries of "Long live Tomas Estra-Suggestion was made that Secretary da Palma," "Long live the honorable man.'

The former president acknowledged cordially this appreciation of his services, but he pressed on and quickly boarded the special train, which started for Matanzas almost immediately. As it pulled out of the station cheers the Panama canal zone, just returned for the ex-president were given. At from Panama, will be appointed gov- this point Mr. Palma made no further endeavor to conceal his emotion. He of Cuba in succession to Secretary stood on the rear platform of the last Taft. Both the president and Secreticar, waving his hat, tears coursing tary Taft had in view the designation down his face, and calling "adieu" to of Governor Winthrop of Porto Rico the crowd as the train moved away. for this office. The president, how- The former members of the cabinet ever, expressed the belief that he can and their wives and a few others acbetter spare Governor Magoon from companied the Palma family to Mathe Philippines, having been appoint tanzas, where the latter will remain a ed recently a member of the Philip- few days, later going to their old

CHINKS MUST GO

Or There Will Be Revival of Drastic Means to Move Them.

Eureka, Cal, Oct. 3. - At a mass meeting of prominent citizens and from any one else any compensation president expects Mr. Taft to return union labor leaders here it was decided that 27 Chinese brought here by dered those services because we bethe Tallant company of Astoria, Orc., lieved it to be a high public duty to to work in a salmon cannery at the prevent Hearst from depriving the ma-Coshocton, O., Oct. 3.—Claude Tid- bility of a postponement of his trip to mouth of the Eel river, must go. The people of the county are aroused and their duly elected candidate, George the scenes enacted Feb. 13, 1885, when B. McClellan." the Chinese were driven out of this city and county for killing a citizen as the result of a highbinder war, may be re-enacted. It is said that the Tallant company, which operates the cannery, declares its intention to call on the governor for militia if any demonstration is made against the Chinese.

Mobile, Ala., Oct. 3.-Roy Hoyle, a special officer of the Mobile & Ohio applied to other public questions. railroad and one of the most widely From the same convictions, will furknown and best liked railroad men in this vicinity, was fatally shot, and Sidney Lyons, chairman of the city council of Mobile, was wounded in the hand during a fight at the county jail chance at self-government. Unless between deputy sheriffs and a crowd not recede one step from the adof men determined to capture Dick Robinson, 17, a negro. The mob is to deal with the Cuban situation, as hunting the negro, and will lynch for every moral and political reform him if captured. The negro attacked Ruth, the 12-year-old daughter of Blount Sessaman, who lives about in his inaugural address. Entertainthree miles from here.

Hawaiian Candidates.

Honolulu, Oct. 3.—The Democratic and Home Rule parties held their ter-Democrats named E. B. Lanahan, an offered the position and has had the attorney, for delegate to congress. He for office in the history of the island. The Republicans nominate Prince Kalanianaole, the present incumbent. The Home Rule candidate is Charles Notley, part Hawaiian.

yeoman's Case Set For Trial, Newport, R. I., Oct. 3. - The suit brought by the yeoman Fred J. Buenzle against the Newport Amusement company for regarding him while in uniform admission to a dance hall controlled by that organization was assigned for a jury trial in superior court. This is the case in which President Roosevelt and Rear Admiral C. M. Thomas contributed to the yeoman's expenses, the trial being viewed as a test case for the honor of the United States uniform, _____

HEARST CHARGE

Former Candidate For President Is Roused From Silence.

HIS REPLY RATHER CAUSTIC

Says His Service For McClellan In Mayoralty Contest Was Entirely Gratuitous -- Ohio Candidate States His Position on Moral Issues-Democratic Campaign Book.

New York, Oct. 3.-Judge Alton B. Parker gave out a statement in reply to an attack made on him by William R. Hearst in a recent campaign speech. In his address Hearst said Parker appeared in an election case on the side of election criminals in the court he formerly graced and there argued against and secured a reversal of an opinion he formerly rendered. Judge Parker's statement follows: "For something more than two years now I have submitted without reply to the wanton assaults of William R. Hearst. I should probably pay no more attention to his insulting and maliciously false speech than I have to his other attacks, were it not that the necessary and intended inference of his speech constituted an attack upon a great court-a court with a membership that is not surpassed in this or any other country. While tha. court is so well grounded in the confidence and the affections of the people as to need no defense from any such attack, the opportunity is afforded to warn the people that a man having such conceptions of the judiciary as will permit him to make such an attack ought never to be permitted to name men for the bench, as it is said Hearst contemplates doing under the Murphy-Hearst deal."

In reply to the charge that he acted as attorney for corporations in the McClellan-Hearst contest Parker says: "This statement about me, like many others of Hearst's that have been brought to my attention, is wholly false. Neither I nor any member of my firm was employed by any corporation or paid by any corporation, diderectly or indirectly, one dollar for services rendered in that contest. We were retained by Mayor McClellan, but declined to receive from him or whatever for our services. We renjority of the people of the services of

Statement by Hoskins. Wapaoneta, O., Oct. 3.—In reply to a request for a statement of his views on temperance questions, Samuel A. Hoskins, Democratic candidate for secretary of state of Ohio, sent the following letter to Dr. J. H. Fitzwater of Delaware. O.: "In reply to your recent inquiry made on behalf of some East St. Louis, III., Oct. 3.—The city of your friends with reference to how

the dismissals. Lieutenant Doyle will leads logically to the initiative and office. If he obeys the council he will as a Democrat I firmly believe in this be dismissed by Mayor Cook, and it doctrine, and that it should be applied is said if he fails to obey the council, to political and moral questions alike. Speaking from my personal convictions on the subject, will say that I believe the liquor question should be subjected to the same tests that are ther say that I think each political unit, municipality, township or county should decide this question for itself. Perhaps I can state the matter more concisely by saying that we should vanced moral ground taken by the late Governor Pattison, and I stand for which he stood, including the declaration for county local option made ing these convictions, I am glad to comply with your request and let you know how I personally stand."

> Accused of Blackmail. Racine, Wis., Oct. 3.—Fred C. Stocking and H. D. Miller, arrested in Milwankee on a charge of trying to extort \$20,000 from Mrs. Richard T. Robinson of this city, were brought here from Milwaukee and put in jail. Stocking is said to have admitted that | he wrote the letter to Mrs. Robinson demanding the money.

Cooked in a Boller. Vincennes, Ind., Oct. 3.—Gustave F. Friend, a boilermaker, was fatally burned by the accidental turning of steam in a boiler in which he we working. Friend's flesh was cooked. He lived five hours after the accident.

Amiability. Bogg-Did he hurt himself when he fell downstairs? Fogg-I think not. He died without making a sound.-Harper's Weekly.

BOAST VERIFIED. Proved to Doubting Comrades That He Really Was a Mankiller.

Chicage Oct. 3.-Michael Shoemaker, 35 an Austrian laborer. boasted that he was a "manuiller" at Gary, Ill. Four of his countrymen, fellow laborers in a stone quarry, questioned his prowess, and Shoemaker proceeded to stab one of the scoffers to death, slashed another so severely that he will die and put the other two to flight. He gave chase to one of the fugitives, who ran a mile and a half with the enraged man only a few steps behind him. Then Shoemaker fell from exhaustion, while the man pursued ran on to Summit, Ill., and gave the alarm. Shoemaker was brought to Chicago and put in the county jail.

Clothing Cencern Clored. Syracuse, N. Y., Oct. 3.-New York creditors filed an involuntary petition in bankruptcy at Auburn against George Freeman & Company of this city, clothing manufacturers. Frank Rogers of Syracuse was named as receiver. Liabilities are given at \$90,-000, with small assets.

CUT TO THE OUICK.

Dr. Randolph Stonycroft killed and two others injured in streetcar accident at San Francisco.

M. Hager, Swedish vice consul at Batoum, Russia, was assassinated in his carriage at outskirts of Batoum.

John C. Baker, 38, head of New York Herald's art department, shot himself. Afflicted with nervousness. At Chicago health officers seized

and condemned 30,000 pounds of decomposed poultry at two cold storage Thomas Hudson, 68, shot and killed at Philadelphia by Robert Stanton,

18, a neighbor, who mistook Hudson for a burglar. Fire destroyed roundhouse, 18 loco-

motives and repair shops of Western & Atlantic railroad at Atlanta, Ga. Loss \$175,000.

Democratic Text Book.

Washington. Oct. 3. - Bearing the motto, "Equal rights to all, special privileges to none," on its title page, the Democratic campaign book for use in the approaching congressional campaign was issued by the Democratic congressional committee. It is one of he most voluminous of any similar publication heretofore gotten out, being composed of 243 pages, and containing a vast amount of matter designed to combat the claims and policies of the Republican party, while at the same time it upholds principles for which Democracy contends. After quoting in full the platform adopted by the national Democratic convention at St. Louis in 1904, the book enters into an exhaustive discussion of the tariff question slong the lines of the party's well known tariff policy. The trust question is handled in a similar manner. A ship subsidy is opposed. Among other subjects treated are the insurance scandals and campaign contributions, railway rate legislation, and various features of President Roosevelt's administration.

TIDAL FLUX AND REFLUX.

Complicated Movements of the Billows of the Oceans.

Those who see the rise and fall of the tides in our Atlantic harbors seldom think of the wonderful course of the ocean waves which cause the tidal flux and reflux. Such billows not only cross the sea, but flow from ocean to ocean, and in this way complicated movements are set going.

Thus, for instance, once in every twelve hours the moon raises a tide billow in the southern Indian ocean; When this billow passes the Cape of Good Hope at noon its successor is already born, and by the time the first billow has reached the Azores islands at midnight the second is rounding the cape, and a third has come into existence in the southern ocean. By 4 o'clock in the morning following its passage of the cape the tide billow reaches the English channel, and there the shallow waters delay it so much that it does not arrive at the strait of Dover until 10 a. m. Here the narrowing channel causes the tide to rise very high and almost puts an end to the wave.

In the meantime another branch of the billow runs around the western side of the British islands, rounds the north point of Scotland and moves slowly down the eastern coast of England until it finally flows up the Thames and laps the wharfs of London.-Philadelphia Record.

The Palisades.

This uplift of volcanic matter, resting on baked sandstone and inclining westward at a gentle slope, presents in its riverward aspect the columnar or palisaded appearance that so impressed the early voyagers-a gray wall beetling from 300 to 500 feet above the tide, shagged with trees at the summit half huried behind a scrap of talus, that is also verdurous. At Nyack it bends into the amphitheater where that pretty town has nestled. surges riverward again to form Pointno-Point and, still ascending behind Haverstraw, reaches in High Tor a lift of 820 feet. As the dike extends southward also to Bayonne, its total length is forty miles, but the Palisades proper front the river for half that distance.-Charles M. Skinner in Century,

Called His Bluff.

"What!" cried the brutal husband. "You gave that old overcoat of mine to a tramp? You should have asked me first. I had placed a hundred dollars in bills in one of the pockets of that safe place until you should want to purchase some clothes." One Eyed Giants.

row.'

Sir John Mandeville saw all sorts of queer things and wrote about them in his celebrated book of travels. It was in 1536 that the veracious John visited a certain group of isles (yles be called them) which was inhabited by a race of one eyed giants. Of them he says: "In one of these yles ben folk of grate stature, as giantes, and they been hideous for to loke upon. An thei han but on eye, and that is in ye middyl of ye front." He also tells of another one of these "yles" inhabited by a race of one legged dwarfs, each having three eyes.

DIED SUDDENL

She Passed Away in the Sixteen Church Sunday.

The Funeral Will be Held from the Sixteen Church Wednesday Afternoon at I O'clock -Interment in the Sixteen Cemetery.

Mrs. John M Anderson, aged 60 years, the wife of a well known farmer living west of Massillon, died in the Sixteen church of heart failure Sunday afternoon at 2.30 o'clock. Mr Coal Operators Cannot Get and Mrs. Anderson had arrived at the church some time before from their home about two miles distant. They were members of a Sunday school class and arrived just before the class was too late, after all."

The closing exercizes of the Sanday school were about to be commenced when Mrs. Anderson complained to Mr. Anderson of severe pains in her head. She sank into a seat and was unconscious in a moment. The services were brought to an abrupt end and Mrs. Anderson was carried to the front part of the church away from the seats. Dr. Campbell, of East Greenville, was summoned by telephone, but Mrs Anderson died before his arrival. She lived about fifteen m nutes after fainting.

The body was taken to the late home, many friends and the Rev. W. S. Adams, pastor of the church, accompanying Mr. Anderson. The deceased 13 survived by her husband, one son, Harvey Anderson, of Dalton; one daughter, Mrs. Eli Mock, of East Greenville; and four sisters, Mrs John Baer, of Sixteen; Mrs. Abraham Zupp, of East Greenville; Mrs .W. Armstrong, of Fredericksburg, and Mrs. V. S. Brown, of Massillon.

the Atlantic to the Pacific as "The Brotherhood Man." He comes to Massillon to help dedicate the new Presbyterian church and organize a Brotherhood. Two hundred and thirty-five men have signed cards declaring their intention of hearing him at 9 o'clock next Sunday morning. More than fifty men have signed a petition asking for the organization of a Brotherhood. Mr. Powell is a great organizer and Massillon is favored in having such a distinguisht guest. He wil be the guest of Dr. and Mrs. Bigger during his stay in Massillon. Everything is ready for him and next Surday will be a great day for the people of this city.

Enough Cars.

MANY IDLE DAYS THIS FALL.

The Miners are Responsible for Several Idle Days Because of Strikes Inaugurated by Them Over Grievances.

Just at present the coal industry in the Massilion district is far from sat isfactory to both operators and miners. The former are kept busy wrestling with the open market and the problem of car shortage, while the latter are tist overing hardships in the new wage scale and are forcing several idle days by refusing to go to work until matters are settled. The outcome of pres-

The operators have all the trouble they can surmount with market conditions. Other fields have entered the markets heretotore almost entirely supplied by the Massillon producers. One of the most serious questions at present is the inability of many operators to obtain sufficient empty cars to keep the mines running. One large producer was able to keep his mine nunning but twelve days last month, erated every day in the month. Rail-

been asked to take up the question with reference to the Massilion district. It has been informed that one large coal company in Ohio which owns mines in the Massillon district be permitted to work. as well as in other districts, receives practically all the cars needed in its many branches of trade. The charge is also made that the Wheeling & Lake Erie has stenciled several hundreds of cars for this company, thus preventing the use of these cars by the small operators. Many such cars pass thro Massillon daily and are in use from some of the mines near this

It is claimed by the small operators that this tends to give a monopoly to he company having stenciled cars. The car distributer at Massillon canmer, is dead at his home near Orrville, not give these cars to any other firm, altho the cars may not be needed by the leasing firm but sorely needed by the small operators. The operators also desire that bills of lading be furnisht with each car.

ternal differences, which as yet have not reached the public's notice to any extent. For the first time in many seasons the year's work has opened up daughter and two granddaughters, with difficulty added to difficulty. The Miss Grace Oberlin, of Massillon, and interpretation of the wage scale has Clyde Oberlin, of Stanwood. The fu- given continued trouble. There have been several strikes at individual mines over minor causes, which have been entirely absent in former years. and the Rev. W. S. Adams officiating. The miners feel that they are losing time and money but they insist that there shall be a full and complete un; derstanding of all differences between them and the operators and between themselves and their officers. The resuit of the difference has been that the Massillon mines have not averaged one half time this fall. September, making elaborate plans for dedication with its beautiful mornings and pleasant weather for work, has past, and be held in the morning, afternoon and the cool days will soon be followed by more severe weather The condition of affairs does not bring confidence to organizer of the work, is expected to the operators nor satisfaction to the

REJECTED RULE

A Committee Will Meet the vised by many. Operators.

NEW RULE IS DEMANDED.

The Miners Charge That the Operators Have Shown Dis crimination in Enforcing the Rule Relative to Suspensions.

will no longer accept the rule pertaining to the loading of dirt with coal and have appointed a committee to meet the operators and inform them that the rule will no longer be recognized by the miners and that some other rule is expected by the miners from the operators. The committee, waich was adopted by a unanimous vote at a mass convention, consists of Henry Bogel, William Boseley, John Thomas, James Appleby, Charles Smith, Robert Legg and R. W. Smith, all active members, and the district officials, State President Green and William Morgan, a member of the national executive committee. The officers will act ex-officic.

After the operators have been informed of the action of the convention, the committee will endeavor to secure the adoption of some other rule which will insure the loading of clear coal, but which will not work so severe a hardship upon the miners as the present rule. If the committee and the operators agree upon a new rule, this rule will be referred to the locals in the district for a referendum vote on its acceptance or rejection.

The miners will not return to work before Thursday morning at the earlist, and only at that time providing the operators consent to permit every miner in the district to resume his labor. The operators have suspended some miners for loading dirty coal under the rule which was rejected by the miners. If these men are permitted to dig coal all the other miners will return to work.

The miners expect to learn the , osition of the operators by Wednesday evening. A new rule may not be adopted by that time, but they feel that an expression ought to be obtained from them by that time and to be definite enough for the miners to know whether or not the suspended men will

The mass convention which was called by three locals was held at Oak Point, a rise of land north of the local plant of the Republic Iron and Steel Company and along the Pennsylvania tracks near the old meeting ground known as furnace hill. It was an open air meeting. About four hundred miners were present and there was no mistaking the centiment of those there. They wanted the rule about loading dirty coal rejected and this was accomplisht after an hour's discussion. State President Green, William Morgan, a member of the national executive committee. District President Peter Gorman Vice President John N. Davis, Secretary John Adams, former President Robert Legg and the officials of several locals were also present. President Gorman was chairman.

THE BEE HIVE

For one hour after he called the convention to order, Chairman Gorman permitted the miners to enter complaints. After that time he called for motion upon the question under discussion." The discussion had cleared above, was unanimously voted the were made and moderation was ad-

MISS ESTHER KUNSTLER.

A Clever Lawyer Who Helps New

York's East Side Poor. New York's east side has a successful Portia, and she is only twenty-two years of age. She rarely loses a case and has become champion for the defense of hundreds not only in the police courts, but in the supreme court. The name of this girl lawyer is Esther Kunstler, and she occupies a cozy office with up to date furnishings at 158

Rivington street. The girl is becoming famous for court room repartee. She talks to judge and witness in a "winning" manner, and her wittleisms keep everybody in good humor. She generally creates somewhat of a sensation when she appears

MISS ESTHER KUNSTLER.

in any court for the first time, looking more like a schoolgirl than a lawyer, in simple dress.

As she speaks six languages fluently, her list of clients grows steadily. Many of the east side poor whose rights she has championed look upon her as a sort of angel on earth.

Miss Kunstler was born in a small town in Austria and has been in this country fourteen years. When only twelve years of age she began to study the big law books in her father's office, Felix Kunstler being a well known nopublic on Rivington street. A little more than a year ago she was admitted to the bar. She loves her profession, and her father says it is hardly likely that she will ever abandon it to marry. On this question, however, Miss Kunstler is uncommunicative.

"My work is my life," she said. "I am happiest when I am defending one of my clients. It is a great work, and it is hard work, and I hope to make my mark some day."-New York Globe.

Don't Remain a Seamstress.

I believe that I have met more untwo trades put together. It takes a girl of exceptional will power and physical endurance not to degenerate physically and nervously in this trade. The close confinement, the cramped posture in which you work, the constant strain on eyes, first affect the appetite and then the general health. The girl beyond you cannot stand a draft, so the window is closed, and you get not a breath of God's pure air. The proprietor of the establishment can save rent by selecting a dull, electric lighted workroom, and so you are deprived of God's health giving sunlight. Do not go into a workroom unless you are firmly resolved to bend; every energy to getting out of it again -that is, you must determine to learn as rapidly as possible and utilize the knowledge thus gained on broader lines than eight or ten hours spent under the dictation of a forewoman who will drain your lifeblood if necessary to meet the exactions of a wealthy patron.-Anna Steese Richardson in Woman's Home Companion.

The Art of Chatting.

Can you chat? Of course you think you can, but can you? The more you think of it the more you think you could if you

would. Not all of us even know what it is, says the Philadelphia Record. Of a truth, it is not mere talking. Neither does it approach the art of conversation. Conversation, if there he people capable of it, makes fascinating and

stately entertainment. Chatting is different. Above all, it gets away from speaking on any special subject or hobby. Not that it may not dwell upon one topic, though should it do so it must sparkle from many different viewpoints. Above all, it must not be monologish. The woman who talks continuously of her ailments or servants and the man who never rests his hobby can neither of them chat. In real chat there's the element of the unexpected, the sport of chasing vagrant ideas that are based on everyday topics in which the company joins

has been able to sacrifice his own wishes that some other boy "may have his way," it will help to form and maintain the habit of regard for oth-It is always right to recognize his voluntary well doing. It is not necessary to tell him that he is better than July: other boys. In fact, he should never be told that or given to understand that. But if his action is in conformity with what a boy ought to be it will not hurt him to know that you know and are glad because of the fact. Tell your boy that you are proud of him, mother, and he will think that you are the best mother in the world,

Maid's Cap and Apron.

to think.-Mother's Magazine.

and that's a good thing-for any boy

When one is giving a reception, tea or any little function in which the maid is in evidence at door or dressing rooms, a short, round apron with bib and fancy bretelles is worn, and the cap is a fancy little affair. One of the prettiest designs and easiest to make is a narrow lawn bow made with two short upstanding loops and two long ends and the bow set on a little half circle of frilled swiss. This is formed of a circular piece doubled over and caught down with the bow. The most approved cuffs and collars which can be worn now are the simple hemmed bands of swiss pinned on over, of about three inches depth in the cuffs and a low band for the neck.

Potato Patties. Potato patties filled with minced vegetables make an attractive and dainty entree. Put hot boiled potatoes through a vegetable press, season them with salt, pepper and a little butter and add just enough flour to make a paste that can be rolled without breaking. Roll the mixture into a thick sheet, cut it out with a patty cutter, brush the cakes rightly with egg and bake. Fill the centers with peas and diced carrots, with French beans or asparagus heads. The patties may be baked before they are wanted and be reheated before serving.-New York Sun.

Raw Eggs Made Palatable.

If you have to take raw eggs to build up your strength (and there's nothing much better), take them without beating them up, without breaking the yolk. A dash of rich grape juice over the egg, ı quick swallow, and, although you feel that a glove stretcher has been applied to your throat, the egg is down, and all the taste is a delicious bit of grape juice. Try taking it another time with a squeeze of lemon juice on it or beaten up with lemon and sugar and wateregg lemonude, in fact. And heating it up with milk is still another way.

Breakfast Bacon.

Slice the bacon very thin and shave off the rind, lay the slices in a pan, covering them with cracked ice. After fifteen minutes lift out and broil on one side, lay back on the ice until chilled and broil on the other. Break the slices into small pieces with a silver knife, mix with a soft boiled or scrambled egg and serve on toast. This manner of cooking bacon will consume more time than the ordinary way and happy, sickly women among dressmak- a little more trouble perhaps, but the ers and seamstresses than in any other | deliciousness of it will reward the labor spent.

Incombustible Woodwork. Make a solution of silicate of soda and apply several coats of it to the the soda and mix with it sufficient whiting to make it of the consistency of | fewer pieces are required, and the fire | stroying these. ordinary paint. Then paint the woodwork over with it. Wood treated in this way will not take fire from mere contact with flame; it requires to be heated so thoroughly that gases will be given out, which, of course, would ignite quickly.

Castor Oil.

Children who refuse to take castor oll will take it if fixed in this way: Take one cupful of malk, one of molasses, a half cupful of sugar, two teaspoonfuls of ginger, one teaspoonful of ; St. Louis Post Dispatch. This will give soda, a half cupful of castor oil and flour to roll out. Cut in shapes and bake in a quick oven. One or two are as good as a dose of oil.

Kitchen Towels.

The most solled of kitchen towels will become sweet and white with this treatment: Cover with cold water, put them at the back of the stove, add one tablespoonful of shaved castile soap and the juice of half a lemon. Let it come to a boil gradually, and repeat the process. Rinse first in tepid and then in cold water

Brooms. It is well to know that brooms of green straw do not wear as well as those of the natural color. More brooms are used in the kitchen than almost any other part of the house, so do not buy green ones under the impression that they will outlast the others

To remove those distressing white spots on your polished mahogany, rub gently with a white flannel cloth moistened with spirits of camphor or even eau de cologne if the former is not in the house at the moment.

Old fashioned armchairs may be brought right up to date by covering them, arms and all, with pretty flowered chintz, cretonne or denim in brown, green or dark red.

Did you ever use old stocking legs for oversleeves when working around the house? Try them, and you will like inem.

Glass which has become dusty must be thoroughly dusted off before it is cleazed in any other way.

your boy has been kind to a playmate, TREATMENT OF FINE RUGS. HINTS FOR' HARMERS

How to Keep Them In Good Condition.

George Leland Hunter gives the folers if you tell him that his action is lowing instructions of interest to all known to you and that you approve it, | good housekeepers in an article entitled "The Truth About 'Doctored' Rugs" in Country Life In America for

"The care of a fine rug is everything Just as thoroughbred racers have luxary and affection lavished upon them, so thoroughbred rugs should be treated gently and tenderly. The broom should be used daily on them, and they should be swept with the nap. Every third day, after the sweeping, sawdust that has been slightly moistened should be sprinkled over the rug, which should then be gone over with a carpet sweeper. Be careful to have the sweeping precede the application of sawdust, as otherwise the moisture will turn some of the dust into mud that, caking itself in the threads, will ravel the fibers. Once each week rugs should be mind-with a flat rattan beater.

Fine rugs, like razors-and people, too-require rest. By no means leave sent to cold storage. The process of World Magazine. cleaning as practiced by experts is as follows: First all the dust is removed by the vacuum system; then the rug is spread on its face, liquid olive oil soap is poured over the back, and it is gently rubbed with a brush until a fine lather forms. Then the same thing is done to the face of the rug. After that warm water is played over the rug until it revives. After the hot shower, of course, a cold shower follows, and fer about an hour on a conrug is spread out on the roof, face up, storage."

How to Prevent Coughing.

Coughing is the worst thing for a cough, and in most instances of coughs there is more coughing than is necessary to subserve the purpose of the cough-i. e., to remove offending material, says Dr. A. P. Reed in the Nacases it may stop the cough altogether after a little perseverance: When tempted to cough take a deep breath, filling if possible every air cell, holding it until the warming, soothing effect comes or so long as is reasonable, and mark the mollifying result on the cough, which, even when the latter seems unavoidable, will often be found under control. Repeat if necessary. The explanation of this is that there is a liberation of nitrogen in the air cells which has a quieting, sedative effect on the irritated mucous membrane.

How to Make a Fire.

than it does across, the result is that and the spraying was successful in deburns up more brightly and in half the time that it usually takes. Then when placing a lump of coal on the fire, if you wish it to last a long time lay it with the grain of the coal running across, as the flame travels more slowly across than upward.

How to Open a Fountain Pen.

If your fountain pen is stuck so you cannot unscrew it, wrap a small rubber band tightly around the nozzle or you a grip on the pen that will nearly always fetch it. If you cannot get it to come off by using the rubber, try putting a little powdered rosin on the fingers. I have never known the rosin to fail, but it is rough for the hand. Rosin on the hand will always fetch a tight watch case or any other smooth, screw joint article.

How to Clean Enamel Saucepans. For an enamel saucepan that has become very dirty on the outside nothing is better than a paste made of lemon and boil gently for half an hour. | son in Southern Cultivator.

How to Mend Meerschaum. Crush some garlic to a paste and rub the broken surfaces of the meerschaum

bind with thin wire; then boil for half with white of egg. The latter does not | chimney. require boiling.

How to Sterilize Milk. Place the milk in bottles, closing the neck with a plug of clean cotton wool. Pack the bottles in a large saucepan or boiler, fill the latter with cold water

and bring to boiling point; set aside to

cool gradually.

How to Restore Linoleum, To restore lineleum and ollcloth that have become somewhat dull, wash with milk, let dry and then polish with beeswax and turpentine. You will be delighted with the result.

Agricultaral 30 stors. In the early months 1 of 1902 what proved to be the first stracessful grasoline agricultural motor a ppeared, contesting at nearly all of the great agricultural competitions of the seas on in England and carrying off the gold medals from the horse in every con-

Plowing proved to be the first; phase of farm labor to which the agr icultural motor was introduced; and at which four years ago it made its initial reputation. For a plowing test, among horses, steam power and the gasoline motor two and three-quatter tacres of very heavy clay soil were tsele sted. It was a condition that the furrows were to be mine inches wide and $\sin \varphi$ inches deep. In doing the work mine thorses. three to a plow, with three drivers and three boys, did the work atta to al cost of \$8.28, or at the rate of \$3 68 per acre. By steam power the tot il cost of plowing the same area; amounted to down and then gently tapped-gently, a total of \$9.05, or \$4.08/per acre, and taxed \$4.44, or fat \$1.97 per acred For plowing purposes a three fundowed plow is invariably used, except in the warm weather approaches have heavy clay soils, where a couple of them taken up, carefully cleaned and furrows prove sufficient. - Technical

For Ecae ma of Horses. First give a physic-one ounce each of aloes, soda and powdered ginger. Dissolve these ir one-half pint of boiling water, add one-half pint of cold water and give the whole as a dreuch. After the physic has operated have ready four ounces each of pulver | zed saltpeter and copperas, divide pato twenty-fo ur powders and give one powder in a small bran mash morning tand crete floor that slants slightly cold night. Wash the affected portions of water runs over the surface of the rug | the skin with a asolution of one ownce from sprinklers. Then, in order to take of carbonate of potash in one quart the water out, the rug is rolled with of water, rub it well in and then wash the nap, a light wooden roller being it off with warra water, keeping the the tool employed. After which the animal warm until dry. For the itching wash the parts affected with, a for three clear days and nights. When | solution of one-balf ounce of sugar of the sunlight has removed the last lead and two our ces of landanum in vestige of moisture the rug is rolled one quart of water. You may also up with the nap and is ready for give as a tonic, if it appears to be necessary, one ounce of Fowler's solution, of arsenic once daily in a bran mash and continue for several weeks.-Atlanta Constitution.

Feeding the Poultry.

Never overfeed and of your poultry. 'An excess of feedin " is next to starvation in injurious re wilts. When poultional Magazine. The following directry are overfed they become uselessly fat and unable to me ve about as they in all instances, while in the milder should. These conditions produce vertigo and death. Many f bwis drop from the roost at night from the effects of being overfed. Internal fat provinces heart trouble and kills as well. When a hen is too fat, she should go into the pot for the family table. Y.et all poultry should be kept in good s trong, vigorous condition, with suffic. ent food to make them thrifty and attractive.-Feather.

Cost and Results of Arsenate Spray. As a result of spraying experiments at the Illinois experiment station it Apply with a sprayer all over the plant. was found that four: times spraying Do this repeatedly once or twice a with arsenate of leads at a cost of 17 cents a tree increased the yield of the Most people when setting a fire lay apple orchard about one-half 'and the the wood flat, crisscross over the paper average size of the fruit about onein the bottom of the grate, but let them fifth and so improved the quality of try placing the wood sloping from the the apples that they were worth two sides of the grate to the center, says and a half to three time; as much as Woman's Life. This forms a funnel if the orchard had not been sprayed. for a free passage of air, and as the Orchards in the section indicated are woodwork. Make a second solution of , flame travels up the stick more quickly much infested with the apple curculu,

> Keep Only the Best Stock. Every farmer should constantly endeavor to keep histstock up to the best possible standard of excellence and value by getting rick of every unprofitable animal and supplying its place with another that is better. If this practice is closely followed and continued efforts made for improvement the farmer will soon find that a most perceptible advance is being made. Keep pen part, says a correspondent of the the best of whatever breed or kind for the farm.

with the fenders which prevent the sows crushing the pigs and should be built so that the attendant may lend assistance if necessary both with convenience and safety. By having all week. the hogs under one roof handling becomes simpler and in case of bad weather much more convenient.

Deep Plowing.

Land should be broken from eight equal quantities of silver sand, whiting to twelve inches. Such as has not and soft soap. Rub well with the mix- been well broken should be broken evture, which must afterward be washed ery year one or two inches deeper unoff with clean, warm water. To clean til you get to the maximum, which I the inside of a dirty saucepan, half consider to be twelve inches, with six invisible. Useful for the mouthpieces fill with water, place in this a squeezed | inches beyond as subsoil.-D. Dickin-

Removing Stumps.

In burning out stamps dig a large hole at and under the windward side with it. Press closely together and of the stump and fill the hole with dry an hour in milk. An equally good ce- cover with sods and soil, leaving a ment is composed of quicklime mixed small opening close to the stump as a

The Molting Hens.

Begin now to give your fowls a more heavy ration of nitrogenous foods, such as linseed meal, animal meal, etc., and thus induce them to grow a new coat of feathers before the cold weather catches them in a half nude condition.

Feeding the Hog.

Better not try to do much for the hog that is sick except to take away the feed for a day or two. When you start in again be sure that you are giving the right kind of feed. Too much is sometimes worse than not enough.

HOW TO PASTEURIZE MILK.

Simple and Safe Method to Be Followed at Home.

Pasteurized milk is that which has been heated to a temperature of between 155 and 170 degrees and kept at that temperature from ten to thirty minutes before being rapidly cooled and put on ice, says Good Housekeep-

It may seem strange that a lower temperature than the boiling point should be the one selected, but bacteria which cause milk to sour are killed at 155 degrees and the disease germs which are likely to be present are destroyed at 170 degrees. For the mother who wishes to pas-

teurize at home, the simplest and (with care) a safe bos --thod is to place the milk in glass jat. ill a pail with boiling water and place the jars in this. The water should come nearly to the top of the jars and above the milk. Set the pail in a warm place and stir the milk occasionally. The milk is heated to the desired degree before the water is lowered to the pasteurizing temperature. Lastly and most important, cool the milk by running cold water into the pail, then stopper quickly and set on ice.

Remember that pasteurized milk may easily become contaminated again and only proper care can insure its remaining sterile.

How to Remove Tan and Freckles. Seasonable materials for bleaching the hands are the acid fruits and the acid vegetables; likewise tomatoes, lemons and limes. Washing the face in buttermilk takes off freckles, removes tan and makes the skin nice and soft again, says the Brooklyn Eagle. It seems to take out the harshness caused by the dust and the winds of automobiling. A good buttermilk bath is thus described by a London beauty special-

"Take enough buttermilk to fill a two quart basin. Stir into it a tablespoon of finely powdered oatmeal and a teaspoon of borax. Mix well and apply to the skin thickly. Let it remain upon the face for fifteen minutes. Wash off with hot water. Riuse the skin well. Dry by spattering the face with the palms of the hands. And when through go over the face with some good powder to fill up the pores. Do not go out for fifteen minutes or half an hour after treating the face in this manner."

How to Care For Chrysanthemums. Keen your chrysanthemums going steadily ahead. This is done by repotting to larger pots, if their roots have filled the old ones, by the liberal use of some good fertilizer and thorough watering, says a writer in Outing. In hot weather it may be necessary to apply water to the roots twice a day. Always keep the soil quite moist. Be on the lookout for the black beetle. This is the most dangerous enemy of the chrysanthemum. My remedy is white soap melted and mixed with water in the proportion of a small sized cake to fifteen gallons of the latter day until not a beetle is to be seen.

How to Clean Kid. Rub with very slightly damp breaderumbs. If not effectual, scrape upon them dry French chalk when on the hands and rub them quickly together in all directions. Do this several times. Or put gloves of a light color on the hands and wash them in a basin of spirits of hartshorn, says the Boston Traveler. Some gloves may be washed in a strong lather made of soft soap and warm water or milk, or wash with rice pulp or sponge them well with turpentine and hang them in a warm place or where there is a current of air and all smell of turpentine will be removed.

How to Care For Lamps.

To make a lamp give a good light wash the burner once a week in a hot solution of soda, a teaspoonful of soda to a pint of hot water. To clean a lamp chimney hold it over the steam of a kettle and polish dry inside and out with a new-paper. Lamp chim-Farrowing pens should be supplied | news are made much stronger if when new they are covered with cold water, set over the are and the water is let to come to a boil. Lamps should be emptied and washed out once each

How to Mend Amber.

In mending amber cover all parts but the fractured surfaces with soft paper wrappings. Smear the surfaces to be united with linseed oil and warm ther before a clear fire; then press together and hold in place till cold. The joint may afterward be polished with whiting and water and will then be

How to Make a Perfect Hacklage. A mucilage that will keep well and will remain elastic even when it has firled may be made by dissolving one part of salicylic acid in twenty parts wood, straw and chips. Set on fire and of alcohol and adding three parts of This mixture should be shaken well and then added to a paste of gum arabic and water.

How to Polish New Boots.

It is often very difficult to get new boots to polish brightly, but if rubbed over with half a lemon and left till dry they will generally clean very easily. The process should be repeated if necessary. 3

How to Clean Hair Combs.

Combs should never be washed, but they may be cleaned by brushing and by pulling a piece of cotton through the teeth, changing it as it becomes solled. Finally, rub well with a clean cloth.

DR. KUTCH EX. U. S. EXAMINING SURGEON.

4te of Chicago, Greatest Living Specialist for the Treatment and Cure of all Long-Standing and Difficult Chronic Diseases and Diseases of the Bicod and Nervous System. Consulting Surgeon at Maplewood Sanitarium. Will, by special request, meet his many patients in this county every month for the next year, and examine all afflicted free. Ohio office, Columbus, O.

Dr. Kutchin will revisit this County every mouth, thus saving his patients the trouble and expense of treiting the city. And he is the count, who carried his any Programs to illus own fingrams to illustrate and make plant to all afficted the caus and nature of their diseases. He prompth

CHRONIC DISEASES.

The Doctor treats no scule diseases, but makes a specialty of chronic and long-standing diseases. Cases given up by other doctors and pronounced incurable, he most desires to see, diseases. Cases given up by other doctors and pronounced incurable, he most desires to see, diseases. Also are treated over 12,000 cases in Ohio in the last two years, many of which had been given up as incurable, some to be Blind, others Deaf, and a Large Number to be Invalids for Life. Now they See and Hear, and many are on the high road to Health. The Doctor is surrounded with a fine collection of instruments for examining and treating all chronic diseases of the Head, Eace, Ege, Ear, Throat, Heart, Lungs, Stomach, Liver, Lidneys, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Bladder, Skin, Brain and Nervous System, Cancers, Tumors, Piles, Swellings, Old Sores, Fits, Brain and Cancers, Cancers,

EXAMINATIONS FREE TO ALL.

Whenever it is known that **Dr** Kutchin is stopping at a place, crowds gather to remark him, and it is not to be wondered at when it is remembered that in diagnosing a disease he never asks a question, but describes the different diseases better than the sick can themselves. It is a wonderful gift for anyone to possess, and **Dr**. Kutchin's diagnostic powers have created wonder throughout the country.

He adopted the following plan, which is peculiar to the large hospitals, and is not and never have been the practice of country doctors, viz. he carefully notes the symtoms of the patient, and has been the practice of country doctors, viz. he carefully notes the symtoms of the patient, and has been the practice of country doctors, viz. he carefully notes the symtoms of the patient, and for future reference. In this way he ascertains the true nature of the disease and its cause of the sick people consult him he readily tells them, whether he can cure or help them, or whether they are beyond hope.

HIS IMPROVED METHODS OF TREATMENT.

Are mild and pleasant; agree perfectly with the most delicate Lady or Child, do not reduce strength, can be used while at work, and give the greatest possible benefit in the shortest possible time. Patients can consult him or communicate with him as often as they cloose, during the whole time required for the care, without regard to where they may be, and without extra charge, thus rendering the treatment as successful and satisfactory as though they were living next door to each other. MANHOOD PERFECTLY RESTORED.

Quick, paniless land certain cure for Impotency, Lost Manbood, Spermatorthesa, Los-cs, Weakness and Nervous Bebuity, also for Prostatis, Varicocele, and all private diseases, whether from imprudent habits of youth or setuatexcesses in muture years, or any cause that debilitates the sexual functions, speedily and permanently circle Consultation free and strictly confidential. Absolute cures guaranteed in cases curable. No risk incurred.

DISEASES OF WOMEN. Such as have baffled the skill of other physicians and remedies. Dr. Knichin quickly cures neers, Tumors, I throad and Polybroid. Growths cured without the use of the knife. No

uiting, no pain, no danger. LIFE OF EXPERIENCE.

The Doctor has had a whole life of istudy and experience in his profession, and enjoys antantages which full to the lot of but few! After uttending his Fall Courses in the Medicar Colliges, and graduating, with the highest honors, he was not content to stop there, but has since attended other Colleges, and several times reviewed the whole profession, has also has since attended other Colleges, and several times reviewed the whole profession, has also traveled expensively for the purpose of improvement, having visited the best Medical of Colleges, it is the content of th LATEST DISCOVERIES AND IMPROVEMENTS.

Dr. Kutchin has retained the most approved instruction in Analytical and Microscopical Examinations of the Blood. Urine, etc., which are now considered indispensible to a carrect diagnosis in many diseases. There are many diseases which physicians in common gratical diagnosis in many diseases. There are many diseases which physicians in common gratical diagnosis in the control of the control o

FACTS FOR MEN OF ALL AGES. By reason of false modesty the youth of our land are kept in ignorance of the ruinous results which certain solitary indiscrect practices produce. These vices when persisted in eventually undermine the constitution inducing persons depictly and premature decay. But eventually undermine the constitution inducing persons depictly and premature decay. But described in a solitary indiscrete the most successful and celebrated specialist for the treatment and cure of these affections. You may consult him eclebrated specialist for the treatment and cure of these affections. You may consult him with complete confidence. Of all the maladies that affine marking there is probably none about which physicians in general practice know so little.

DELAY IS DANCEROUS.

Many diseases are so deceptive that hundreds of persons have them before they even suspect it. They know they are not well, but are perfectly ignorant of the dendy fangs which are fastening upon them, and must, sooner or later, certainly destroy them, unless rescued by a fastening upon them, and must, sooner or later, certainly destroy them, unless rescued by a fastening upon them, and must, sooner or later, certainly destroy them, unless rescued by a fastening upon them, and must, sooner or later, certainly destroy them, unless rescued by a fastening upon them, and must, sooner is allful every amount of neglect brings you nearer its incurable stages, when, perhaps, the most sailful phisperin can runder you no assistance. MEMBER OF THE ASSOCIATED PRESS.

THURSDAY, OCTOBER : 90

It is interesting to observe that within ten years, according to prophecy, communication will be opened with the planet Mars. It is not too soon, perhaps, to enter upon the discussion of proper ways to begin the conversation and to decide what is to be done in case Mars, like many important public personages, declines to be interviewed.

or original in the Democratic campaign book issued this week for use in the approaching congressional campaign In the way of speeches and other useful data it leaves nothing to be desired. It asserts that Democratic control is the solution for every problem now faced by the American people, deals with the history of the tariff, lambast- Suspended Miners Must Serve ing it with the arguments familiar in the last haif dozen campaigns, and winds up with a vicious attack upon President Roosevelt. In the last named particular the Democratic congressional committee has certainly his senses will take any stock in the assertion that "even when he (the in order to disguise an evil purpose, policy." Such talk is mere bosh and partisanship.

The Pittsburg Times comments pleasantly upon the fact that in the international contest of aeronauts, which started from Paris on Sunday, and ended Tuesday, Lieutenant Frank Lahm, formerly of Canton, covered four hundred and fifteen miles without descending, a creditable record considering the meteorological conditions that prevailed. "The aeronautic contest, therefore, has proved," says the Times, "that the potency of the Ohio man and of the old-fashioned balioon still survives. Foreigners may devote a lifetime to studying the perilous art of sailing thru the air, but along comes a young Ohioan, relying simply on his Buckeye luck, and takes away the chief prize from under their noses A contest like this is reassuring. It shows that we shall not have to change our preconceived ideas of the Ohio man's prize-winning genius nor of the balloon's ability to cope with its newer and more sensational rivals."

A PUBLIC SCHOOL PROBLEM.

corrigible. If a boy is found actually conference. defective or irresponsible, his parents Haves, Conn.

The old treatment for cases of incorrigibility was corporal punishment. the efficacy of which depended mainly upon the character of the teacher and upon the method of its administration. A great change has taken place in nublic sentiment in recent yeartoward this method of punishment Not only do school boards and the public at large discourage the use of nell. the rod, but principals and teachers themselves recognize that the best results cannot be obtained by its frequent and unrestrained use. Many American school boards have forbidden corporal punishment. Such being the case, Superintendent Beede makes several most important suggestions.

What is needed in all schools, he friends and relatives here says, most of all in those where incorrigible boys are found, is first, good, working, school order with business Mansfield going on all the time; second, a cheerful, responsive, school spirit with New Philadelphia, are visiting at the two another problem has arisen with and the death of Roy Hoyle. sympathetic relations between teacher home of Mrs John Buer, in West the introduction of the hopper feeding and the pupils; and third, the effect Brookfield ave adaptation of school methods and means to individual needs, defects and Lorain, are guests of Mr. and Mrs poculiarities. In dealing with incor. ritable boys the most important element is the teacher. She holds the key of the situation; more than that, she is the key. In most rooms there Ohio R R. Consult our agents before cient to raise enough pullets to replace should be no incorrigible children; in pur hasing tickets. some there never are any; troublesome children in some way disappear in these rooms; there is no evidence of the room of the good spirit of the room. Twants all years the contract of the room.

seems to absorb them, just as the blackest smoke disappears in a cloudless sky. Everything is pleasant and homelike, children and teacher like THE INDEPENDENT COMPANY, each other and the personality of the teacher is so strong as to overcome and control any evil tendencies that may exist. In other rooms, incorrigible children stick out like quills on a porcupine's back.

dle the case, Superintendent Beede has three suggestions to make. First, that the boy may be placed in another Both Phones No 60 | room ct corresponding grade where conditions may be different; second, THE INDEPENDENT is on sale at the following that it would be well to establish in every large building a special room where an incorrigible boy could be placed; third, that there should be in every large city, in connection with the school system, at least one disciplinary school for truants and incorrigible boys—boys who do not yield to the milder pressures already sug-

MINERS WILL

Tuesday Evening.

ANOTHER MEETING ON FRIDAY

Out Their Penalties-The Operators Did Not Suggest a Change in the Old Rule.

The miners of the Massillon district overreached itself. No Democrat in will go to work Thursday morning and the printing of the ballots, which remain at work pending a settlement of existing difficulties between them President) tells the truth he does so and the operators. The suspended miners will be required to serve their or to jusify by precedent a wicked penalties for loading dirty coal. The old rule inflicting a penalty for loading dirty coal is now held in abeyance pending the adoption of another rule. The operators refuse to attempt to change in the present rule concerning and still refuses. the suspension of men.

meeting between J. C. Haring, George upon having the matter presented to H. Hornickel, J. L. Green and F. F. it ordered the clerk of courts to issue Taggart, for the operators, and State the writ as prayed for and have same President Green, William Morgan, the served upon the auditor, directing him miners' district officials and the com- to issue the warrant on the treasurer mittee of seven miners appointed at a for the \$33 asked, or else that he apmass convention Tuesday. The meet- pear in court at 9 o'clock on the morning was held Taesday evening in the ing of the 3d of October and show office of the Massillon Coal Mining cause why he has not done so or Company.

The miners asked that all suspended miners be permitted to return to work titioner. pending a settlement of the trouble. This was refused by the operators. The Auditor Oberlin says: miners asked for a new rule governing the infliction of penalties for loading dirty coal and the operators again re- tures. I have said there will be no miner is found guilty of loading dirty Attorney Willison, of Massillon, who It is not necessary to define the in- and will be required to take the pen- viding the circuit court decides the corrigible boy. HOW TO FEED HENS.

Experiments Being Conducted by the Government,

Washington, Oct. 3 .- The department of agriculture has started a new experiment station at the federal ani-Miss Nellie Wolfe is employed at mal quarantine station at Halethorps. near Baltimore. The experiments are to be conducted under the supervision was recently added to the staff of the bureau of animal industry for a particular line of investigation. For several years it has been a strongly contested question among poultrymen system on a commercial scale.

In conducting these chicken-laying experiments a henhouse will be constructed divided into three p ns. each accommodating twenty-five hens, with suitable yarda. This house, together single and round trip via Paltimore & with incubators, brooders, etc., suffithose used in the experiments, will comprize the immediate equipment The different lots of fowls are to be housed exactly slike and all conditions made equal, except the methods of

feeding. The fowls in pen No. 1 will receive morning and night a mixure of cracked grains scattered in a litter, and at noon a moistened mash. Those in pen No. 2 will receive morning and night the same grain mixture ted in the litter exactly as with pen No. 1 and the same mash at noon, except that this mash be fed dry. This will test the question of the dry and the moist

> The fowls in pen No. 3 will be fed from two self-feeding hoppers, one containing the grain and the other the dry mash. The hopper containing the grain will be opened about 4 p. m. in winter and 5 p. m. in summer, and will be left open until the next noon. It will then be closed, and the hopper containing the mash will be opened and left so until the first hopper is again opened, late in the afternoon. In this way the hens will have feed before them all the time and can eat as much ox as little as they please. A comparison can then be made with pen No. 2, the only difference between the two pens being that pen No. 2 receives its feed at stated intervals and in amounts indicated by the appetites of the fowls, while the hens in the other pen can help theraselves at all

White Plymouth Rock fowls will be used, not because of any special preference for this variety, but for reasons of convenience. Fullets will be raised from the various pens and the test repeated twice to confirm results and note the effects of the different systems on vitality.

It is hoped that by a careful study of this chicken dietary question the amount of eggs produced in this couptry may be materially increased, perhaps as much as five per cent, which would mean a billion more a year for the national consumption.

TRUSTEES ASKED TO RESIGN.

Governor Harris is Cleaning Up Athens Hospital.

Columbus, Oct. 3. - Without making public his determination as to the investigation of the Athens state hospital, Governor Harris addrest letters last week to John Kaiser, of Marietta, resignations.

At noon Tuesday the governor received the resignation of Mr. Kaiser. vacancy. Nothing was heard from guilt. Mr. Gregg. The trustees elect the subordinate officers and Governor Harris will not discuss the question of whether Steward Carpenter and Superintendent Wilson are to retire or not, but it is presumed that they will.

It is understood that a similar letter was sent to Mr. Williams, of Columwithdraw from the board.

The history of the trouble leading up to this reorganization of the institution is still fresh in the public mind. It was started by C. C Higgins, of the wholesale grocery firm of Eldridge & Higgins, who filed a statement with the governor several menths ago, charging that only one grocery firm. matter to the trustees. They reported your recognition. that there was "nothing to it."

Mr. Higgins came back with new charges implicating the trustees and the governor asked F. C. Rochester, inspector of institutions, to investigate. His report was serious enough in its nature to warrant the governor in referring the situation to the state charity board and a committee consisting of H. H. Shirer, J. N. Oren and R. C. Burton conducted an investigation at the hospital. It was upon their report that the governor based his drastic action, tho it has never been made public.

RELIEF WORK AT MOBILE.

RESTAURANTS.

The First of Them Was Established In Paris In 1765.

For a long time inns and eating houses in France were only intended for the benefit of traveling people, for the people took their meals at home and restaurants were unknown. The first enterprise of the kind was founded in Paris in 1765. A citizen by the name of Boulanger opened in the Rue bull objected and said that the bidding des Poulies an eating house where must be by competition. Last night | soup, meat, fowl and eggs were servpulously clean.

Over the entry to this first eating house the proprietor had hung a sign, upon which were the Latin words, "Venite ad me omnes quae stomacho labo ratis, et ego restaurabo vos" (Come unto me all ye whose stomachs need charge of hurling an egg, which had attention, and I will restore them) This is a parody on the well known Biblical quotation, "Come unto me all ye who labor and are heavy laden, and I will give you rest," only in place of labor and heavy laden he said, "whose stomachs need attention." The word "restaurabo," from the Latin "restaurare" (restore or refresh), was the lishment and gave it its name. Boulanger amassed a large fortune, for his enterprise proved eminently successful, but he was soon imitated, some of his imitators becoming more famous than he.

A Child Wonder.

The French Academy of Sciences in 1729 examined the case of a French lad only seven years old who, in all respects save that of intelligence, was the equal of a man of twenty. His re-Baltimore, Oct. 3.—(By Associated | markable physical development began fifteen or sixteen, and at seven he was a fully grown man. Although his physique was thus remarkably developed, his intelligence was no greater than that of children of the same age. He died before he was twenty. As is usual in such cases of premature development, his strength faded away, and he became prematurely old before other men would attain maturity.

The Pandects of Justinian.

The pandects of Justinian, the most complete body of Roman laws ever collected, were supposed to be lost, but in 1137, when Amalfi was taken and plundered by the Pisans, a private soldier found a copy, which he sold to an the discovery was soon apparent, and the precious volume was taken to Pisa and stored in the city library. When Pisa was stormed by the Florentines in 1415 the precious volume was captured and taken to Florence, where it was placed in the library of the Medici.

Needles.

Needles are all made by machinery. The piece of mechanism by which the needle is manufactured takes the rough steel wire, cuts it into proper lengths. files the point, flattens the head, pierces the eve, then sharpens the tiny instrument and gives it that polish familiar to the purchaser. There is also a machine by which needles are counted and placed in the papers in which they are sold, these being afterward folded by the same contrivance.

True Wealth.

A man's true wealth is the good he does in this world. When he dies men will ask what property he has left behind him, but angels will inquire, "What good deeds hast thou sent before thee?"-From the Arabic.

Bribeless.

To be content is to be happy, and Happiness is one of the three who cannot be bribed; the other two are Love and Death.-Papyrus.

For Lung Troubles

Ayer's Cherry Pectoral certainly cures coughs, colds, bronchitis, consumption. And it certainly strengthens weak throats and weak lungs. There can be no mistake about this. You know it is true. And your own doctor will say so. "My little boy had a terrible cough. I tried everything I could hear of but in vain until I tried Ayer's Cherry Pectoral. The first night he was better, and he steadily improved until he was perfectly well."—Miss. S. J. STEELE, Alton, Ill.

Champion of Pure Food

Side Lights on Dr. Harvey W. Wiley and His Tireless Crusade

Commander of the "Poison Squad" is Somewhat of a Humorist, Who Says Americans Have the Worst Cooks and Get the Least Out of Their Foods -- Has Ridden His Hobby For Twenty Years, Not to Death, but to a New Lease of Life

FF in the course of human events and under the benign influence of the new pure food law the people rink and be merry, giving no thought tken into their systems various poionous substances in their food and rink, the one man chiefly to be thank-1 for that delightful consummation is r. Harvey Washington Wiley. Offially Dr. Wiley is chief of the bureau ! chemistry in the department of agculture; unofficially he may be called immander in chief of the allied and nalgamated armies of the pure food usade in America.

hobby and ridden it hard. At times is Pegasus of his has leaped over apr. Wiley's hobby. By the passage of e measure known as the pure food w last June congress finally approved e efforts of Dr. Wiley and the thounds of other earnest workers in the use of preserving the human stomh from premature decline.

Dr. Wiley takes great joy in his ork. Why not? It is something orth while to devote one's life to the

That remarkable experiment of Dr. Wiley's is no longer regarded as a joke, even by the most hopelessly jocuof the United States may eat and lar person. By years of patient, tireless observation the devoted chemist the horrible probability of having has proved what he set out to provethat the use of substances such as boracie acid, sallcylic acid and formaldehyde as preservatives for food or drink are positively injurious to the human system. By feeding his class of young men various kinds of food preserved or colored with the drugs employed by manufacturers he deduced scientific facts which, embodied in his official reports, had much weight in securing the pure food law.

Incidents of Food Reform.

.Since Dr. Wiley first made himself alling precipices of human prejudice: a popular national figure by thus testing the actual results of the eating of drugged food and boiling those results down to a scientific certainty many events of importance in the matpears to have arrived very near the ter of food reform have taken place in the United States. Quite recently we have had Upton Sinclair's expose of packing house horrors in "The Jungle," followed by the passage of the meat inspection law, which requires that after Oct. 1 the manufacturers of canned meats, hams and other packing house products on their labels must call a spade a spade and not deceive the public by sending out canned yeal or pork with a picture of a spring chicken on the label.

Dr. Wiley's work has dissipated several misconceptions. For instance, he has shown that it is not necessarily the food adulterants, but the preservatives and colorings, which do the damage to

The conversation turned to good old fourteen-year-old whisky, American

you some fourteen-year-old whisky in Turning to his chemical apparatus,

the doctor took a bottle of alcohol. some burned sugar and other things and five minutes later had concocted a beautiful red liquor, which he passed around. All pronounced it fine old whisky.

"It isn't whisky at all," said Dr. Wiley. "It's the stuff that is often called whisky. By the use of what is known as 'ageing oil' the greater portion of the stuff labeled 'fourteen-year-old whisky' is made in less than fourteen

Hams Smoked While You Wait.

As a member of the government's pure food law commission, sitting at New York during the latter part of September, Dr. Wiley adduced the fact that hams may be smoked while you wait. One witness testified that his house used a "patent smoke" for making smoked hams. This is a sort of paint, with which the ham is smeared, giving it the appearance of having been cured in the dear old smokehouse at home, as your grandmother used to do it.

Directly as a result of Dr. Wiley's investigations some very astounding facts regarding the true identity of the stuff we put into our stomachs from day to day have been brought to light. Just one item will suffice here. Your stomach may be too weak to stand more. The patient and long suffering mule that pulls the garbage cart past your door is more important than he looks. Do not scorn him. Next year he may be silent, alas, in death, and you may be eating his hoofs metamorphosed-supendous change!--into "pure apple jelly" or "pure peach marmalade." But the fact that you are eating the hoofs of the defunct mule is not the most serious part of the proposition. The coloring matter used to deceive you into mistaking prepared mule hoof for a peach or apple product is the serious thing. That is what does the

Dr. Wiley has estimated and declared that about 90 per cent of the manufactured foods sold in America contain deleterious substances introduced for the purpose of deceiving the public as to the true character of the product. "Barnum made a colossal fortune," remarked Dr. Wiley on a recent occasion, "by acting on the principle that the American people like to be humbugged. To be cheated, fooled, bamboozled, cajoled, deceived, pettifogged, demagogued, hypnotized, manicured and chiropidized are privileges dear to us

Even the operation of the new food law, if rigidly enforced, will not rob the American people of their cherished privilege of being humbugged if they continue to believe the statements of some manufacturers that certain drugs are good for their health, but the law will reduce the humbuggery very appreciably by insisting upon the proper labeling of all products, so that if one wants pure apple jelly he may buy a jar so labeled and if he prefers mule hoof he may go around looking for a label to indicate the animal.

It should be remembered that the new law relates not only to food, but to liquors and medicines, so that there must be government inspection of everything that goes down the human gullet provided that it is sold from state to state and thereby comes under the head of interstate commerce.

Uniform Food Law.

Dr. Wiley worked as hard for this uniform food law as many estimable clergymen are working for a uniform divorce law. As a matter of fact, the situation regarding food is pretty much the same as that regarding divorce. Each state has its own laws relating to food and to divorce. There are fortysix states and forty-six variations in divorce possibilities. Until the passage of the federal food law the manufacturers of some food products were compelled to place a different label on their goods for every state to which shipment was made. When the national law gets into active working order one label will serve for each state, and that label, if the government inspectors do their duty, will tell exactly what the package contains.

The fight for a pure food law in con gress lasted nearly twenty years. Dr. Wiley says the consumers started it, aided by the grangers. Then some of the honest manufacturers took it up and finally some state officials, who urged a federal law. Of course the proposed legislation was bitterly opposed by unscrupulous manufacturers of embalmed foods, doped medicines and prematurely aged whiskies, but the "awakened conscience" of the people along various lines at last brought about the enactment of the present law, which gives excellent promise of food reform after it goes into effect Jan. 1.

Dr. Wiley, who is a native of Indiana, in his sixty-second year, has never found time to get married. His life since early manhood has been devoted undividedly to chemistry. As a bachelor his remarks concerning cooks may be of interest to married people. Says Dr. Wiley: "We have the most abundant and best foods of the world, but we live more poorly than any other civilized nation. We have the worst cooks and know least how to get the most out of our foods. Cooking is looked down upon here. It should be considered one of the fine arts, and a cook should command a high salary. I know families in Washington who live at the rate of \$5,000 or \$10,000 a year and A lonely goat sat on a rock a-snoozing, who nevertheless will get some ignorant woman to spoil their victuals. They will spend thousands of dollars on their tables and waste it all by skimging on the cook."

ROBERTUS LOVE.

the people use the bark of the fir tree as a substitute. They peel the bark from the tree, carefully remove the epidermis and then divide the inner bark into thin layers. The layers are exposed to the sun during their short but hot summer until they are thoroughly dried and are then torn into narrow, strips and placed in boxes made of the fresh bark of other trees. The boxes are buried in the sand, where they are allowed to remain for three days. The second day fires are made over the places where the boxes are buried, the heat from which penetrates deep into the sand, turns the fir bark a deep red color and gives it a pleasing taste and odor. When the boxes are taken up the fir strips are pounded into a coarse powder, and the Lapps use this as we use salt, but more sparingly, because it takes so much trouble to prepare it.

otection of the health of 80,000,000

lonle. It is provocative of joy to suced in inducing the enactment of legal easures calculated to tone up the multudinous Americau stomach, casting it such devils as dyspepsia, indigeson, typhoid and other ills too numeris to mention. Among his intimate iends the good Dr. Wiley is known something of a humorist, and this nality sometimes displays itself upon iblic occasions when he discusses his obby. Once Dr. Wiley was dispensg his chemical wisdom before the mmittee on agriculture of the house representatives when a rural conessman scornfully asked the distinjished chemist to denne a "scientifier

riculturist." "A scientific agriculturist," replied e doctor, "is a gentleman in the emby of the government who can make grow on an appropriation bill where ily \$1 grew before."

Had not Dr. Wiley possessed a keen preciation of humor be could not ive run the gantlet of the joke makis during the four years of his "poison had" boarding house in Washington id come forth fat and jolly, his useliness unimpaired. If he had been ie of those solemn and serious saants of the story books who fly into a rage or grind their teeth when anybody happens to take a jocular view of a highly important, proposition the good Dr. Wiley long ere this must have succumbed to nervous prostration. As it was, he seemed thoroughpense of his unique gastronomic experiment, though he never permitted his strict scientific observation of the results produced by the consumption: of a certain quantity of "doped" food or drink by a certain member of his tree boarding squad,

DR. HARVEY W. WILEY. the human stomach. The fact that frequently we buy and eat something sold under a certain name which is really something else in whole or in part because that something else is cheaper for the manufacturer than the thing he pretends to sell is disgusting, to be sure, but unless it looks like what we intend to buy we do not buy it, and right there is where the wily manufacturer gets in his devilish work. He colors it with aniline or coal tar dyes to make it look like the real thing, and that coloring matter does the damage. For a like purpose of deception certain drugs called preservatives are used. These serve to impress the innocent purchaser with the notion that he is buying wholesome meat, for instance, when as a matter of fact the stuff would be putrid but for the "embalm-

ing fluid" it contains. Whisky In Five Minutes.

Dr. Wiley has stirred up not only those who eat food, but those who drink alcoholic liquors. One evening in Washington he was entertaining a party of friends, who began to discuss their favorite brands of whisky. Scotch whisky seemed to be the most popular. "I never drink anything but the real Scotch," said two or three of the

ARTIST'S QUEST FOR IDEAL GIRL

Search For Beautiful American Ends on Wyoming Ranch.

CHAPSHOT PHOTO HIS ONLY ULEW

After a Worldwide Chase Jules Dupree, Who Had Dedicated His Life to Finding Girl He Saw In Parls, Realized His Purpose With Aid of

M. Jules Dupree, artist and romantleist of Paris and the whole wide world, has ended his quest for his ideal girl, says the Philadelphia Press.

After a year of traveling in all parts of the globe, from the gay boulevards to the pyramids, from the prosaic streets of Philadelphia to the boundless plains of the far northwest, all the while carrying with him a tiny snapshot photograph as his only clew, he has found her.

Better yet, he has married her. They recently salled on a transatlantic steamer for the French capital. The living, smiling woman has replaced the snapshot in Dupree's glad heart, and he is proud and happy beyond words at the wonderful end of an almost hopeless scarch.

The girl was Miss Constance Moquard Learning. The artist found her at last in the doorway of her father's ranch house outside of the little town of Welf, in Wyoming, just over the border line of Montana among the Big Horn mountains. Two Philadelphians who had scoffed with every one else when Dupree's story became known in Philadelphia three months ago were the means to his end-the well known Woif and met him by chance.

"Things like that don't happen nowadays," said those who read of the romance is over. He'd best give up and go back to Paris."

But it seems things like that do happen, and here and there a straggling glimmer of romance remains.

It was on July 7 when a tall, shapely Parisian, with exquisite raiment and black vandyke beard, registered at the St. James' hotel as "Jules Dupree, Paris." That evening he called Manager Miller of the hotel into a quiet corner and showed him a photograph. Had Miller ever seen the original? he asked. Perhaps at dinner, at a dance or a function in the hotel. She had been there once? No?

One October day in the previous year, M. Dupree told Mr. Miller, he was standing in front of the tomb of Napoleon, in his native city (Paris) when a party of American tourists chanced along. Among them was a young girl just entering womanhood. When the artist's gaze rested upon her he realized that here was the ideal he had been dreaming of all his life. He made a quick sketch of her from memory as her party passed on.

A week later he again encountered fountain on one of the boulevards in the city's suburbs. This time Dupree had a camera. He snapped the girl's head as she was raising a cup to her lips. The next moment she entered a big motor car and was whirled from sight.

As the days passed the girl's image proved more and more alluring to Dupree. He made a resolve to find her and meet her if it took him all the rest of his life. He got upon the track of the party and followed them to Cairo. But he arrived there just three days after they had left for parts unknown.

Then he returned to Paris disheartened, but he met several Americans there, among them Julian Story, the artist, and his wife, Mme. Emma Eames, the opera singer, who told him that the little snapshot resembled a Philadelphia girl whom they had met, but whose name they could not recall. And hence Dupree was in Philadelphia at the St. James, looking for her. But several persons who know all the society girls of Philadelphia said that this girl was a stranger. Dupree spent other vain search and then went to Chicago, where cold avarice tried to his service. take alvantage of his sentimentalism. A couple of bunko steerers told him they knew the girl and would divulge her name and address for a large consideration. But Cupid took care of the filled wallet.

It was late in August when one day lawyers, came galloping across country some forty miles from Wolf, Wyo. They saw a lonely figure sitting on a rock. With a wild yell intended to scare the man they rode directly at him and pulled their horses back on their haunches, but the man did not scare. He merely looked up with a tired expression upon his black beard-

ed face. Recognizing him as a gentleman, the young men apologized. They talked with him for a couple of hours, and then he made himself known as Jules Dupree and showed them the picture.

"That girl," said Rogers after a close scrutiny of the snapshot, "is Miss Constance Learning or her double! She winter wheat crop has been officially lives over the border line here-a good reported to be a good one, while the Alfalfa fed in conjunction with corn gallop-in Wyoming."

excitedly jumped to his feet and im- man'a is now expected to produce a plored his acquaintances to get him a record wheat crop, and Servia and Bulhorse, to take him at once to the girl's garin have good crops. The Canadian

as he dol. He led Paul Revere and these chaps begten a mile. He was wild, and he never quit beating that Lor, e for hours. We got to the Leaming place, and there stood Miss Constance in the doorway wondering what this galloping cavalcade wanted.

"We presented Dupree and then went away. What he said or what she said I don't know. But the girl did not recognize him. She had not noticed him in Paris and was absolutely ignorant of his worldwide elre e.

"Anyhow, in a couple of days it was all fixed up. Tapres pre-ented his cre-! dentials to old man Learning, who is a typical westerner and had to be! 'shown.' And the old man was not any too enger to let his drughter go. But the romance of the thing caught the glrl in a second, and Dupree proved himself to be a michty good fellow in every way, and so finally Dad Leuning consented to a marriage, and there was a quiet ceremony performed, I un-) as bad qualities and traits may be derstand, a few weeks ago.

"Before we not away Dupres wanted to embrace Scott and me in the French fashion, but we side stopped and let should be cut from the trees and operation and a willingness to make and care in the handling of this most him shake hands instead. He fairly burned before the worms mature, scatcried with grantude. I laughed at his ter and spin their cocoons. It is a case story when he was here last summer, but he certainly seems to have won out, and I think he deserves to.

"The Leaville, s have a pile of monnational afair. I wish them both all proper age, else once neglected it is a Forts of luck."

Mr. Rovers and Mr. Scott said that they understood an elaborate wedding. according to the French custom, would be celebrated as soon as the happy young people arrive in Paris.

CHURCH "TYING BEE."

Dekalb Young People Sell Old Papers

and Magazines For Charity. The town of Dekalb, Ill., has a church that handles old newspapers lawyers Joseph P. Rogers and John R. | and magazines to enrich its treasury K. Scott, who were roughing it at | for charitable and other purposes, says Rev. George H. Wilson, originated the flight, when pitchfork, clubs and shotidea. He asked the church people to Frenchman's love quest when he was I save all of their old reading matter and in Philadelphia in July. "The age of I to search the house from basement to attic for the accumulations of years. collected and stored in a big shel m the churchvard.

This custom resulted in a happy gathering of young people called a "tyingbee," and it is believed to be a strategy of Dan Cuoid, for, as one of the incidents of the festivities, the pastor soon may have several jobs of tying matrimonial knots. At stated intervals the young men and women of the congregation meet in the back yard of the church and proceed to tie up the great mass of newspapers and magazines lhat have been hoarded.

A local factory in Dekalb receives a great number of parcels tied up with stout cord. The factory people do not save this twine, but cut it off the parcels and then throw the pieces into a barrel. The boys and girls of the Rev. Mr. Wilson's church until the knots and take out the tangles, and with the cord they tie up the bundles of newspapers.

When the church collects a carload of paper it is sent to Chicago. The papers bring 20 cents a hundred pounds the tourists. They were at a drinking and the magazines more. The church expects to realize \$60 from a single carload, and the money will be spent where it will do the most good. All the pictures in the magazines are sold at the rate of 1 cent for the output of each magazine, a portrait collector of Dekalb contracting to take them.

INNOVATIONS OF A BANK

Bedroom In a Chicago Trust Company's Building.

Probably few persons ever thought of making a bedroom a feature of a bank. Chicago has one financial institution at least with such an adjunct the Northern Trust company, which recently moved into its new building at Monroe and Lasalle streets, says the Chicago Post.

The building, one of the finest of its kind in the United States, has many innovations, but perhaps the most remarkable is the bedroom. The apartment is complete in its appointments. It contains two brass bedsteads, with downy coverings, cabinets, dressing tables, narrous and shower baths. Should any director be kept late at the a day or two in Atlantic City in an office or should any employee suddenly become ill this chamber would be at

The Warte's Wheat Crop.

The Lordon Follomist asserts that "the world's coreal harvest of 1996 can not full to prove one of the greatest ever produced." The wheat crop is above the average in the north of France, but it has suffered from drought in the south and west. France will need to import very little if may wheat. Spain has reuped a good lear vest generally, while Germany has god crops of burley and oats as well as of wheat and rye. Austria-Hungare will produce a much larger wheat I it is rich in protein. For hog pasture error this year than last. In Russia the more important spring wheat crop is They were then in Montana. Dupree poor in all but a few provinces. Rouwheat barvest will not prove very "I got a pony for him," said Rogers, absendant. India's wheat crop harvest-

The optimist is rather inclined to emphasize the fact that good as well transmitted from parent to offspring.

Every worm's nest in the orchard of a stitch in time saves nine.

The farsighted and considerate parent will put himself to much inconlack that is seldom made up.

We have found the nasturtium to be insect pests.

A prominent citizen of Wilmington, Del., was recently saved from death from the attack of an enraged bull by his twelve-year-old son, who flashed the reflection from a new milk pail in the Chicago News. The pastor, the the animal's eyes, thus putting him to gun had been of no avail.

Indiana has a fertilizer law which is aimed to protect the farmers and gar-The papers and magazines are then denors within her borders. It provides that fertilizers offered for sale shall not only bear the inspection label of the state chemist, but shall give the percentages of the ingredients which they contain, so that the purchaser

> A poultryman we know is just now having a force of men finish up a henhouse of cement bi is. The walls them files. contain a dead air space, which is a guarantee that it will be proof against the cold and wind of the winter months. Proper food, and exercise, coupled with quarters of the kind described, will insure an all winter's supply of eggs.

Careful tests which have been made seem to indicate that silage properly secured is just as valuable a ration for the steers in the feed lot as it is for the dairy cows. Increase in the price of land, coupled with the application of a greater measure of intellithe entire corn belt.

A friend of the writer this year reports that be picked raspberries of the Columbia variety during a season of five and a haif weeks, and the last berries, which we happened to see, were the finest of all, being borne on vines of this year's growth. About the only drawback with this valuable variety is likelihood to damage by hard winters and stiffness of stalks, which makes the matter of covering somewhat difficult.

A suggestion which has been made by a number of experiment stations and one that will at least be seconded by the stations of all states is that agriculturists should send samples of noxious weeds to their respective state experiment stations with a view to securing a scientific and reliable analysis of them and such suggestions as will prove helpful in their destruction. The state officials in charge of this line of work are always ready and willing to render assistance to residents of the state in the manner indicated.

The law requiring the cutting of weeds along public highways between Aug. 1 and 15, in force in some states, would seem to put the time for the doing of this work just about two weeks late, as our observation leads us to believe that the time mentioned finds the common weeds along the roadside pretty well headed out and far enough advanced so that if cut most of the weed seed is ripe enough to reseed the ground. It would be vastly better if two cuttings were required, one about the middle of July and one early in September. This would nip most of the weeds in the bud and be much more effective in killing them out.

A recent bulletin issued by the Iowa experiment station on the subject of alfalfa culture condenses the good points of this valuable legune as follows: It yields from two to three times as much as clover and timothy and is at the same time a more valuable hav alfalfa has no equal. It is superior to any other crop for enriching the soil will make most economical gains. The bulletin further states that the growing of alfalfa is entirely feasible for the north half of the corn belt and even more northerly latitudes, provided proper care is exercised in the matter of getting it started. Interest in !ts merits become better known,

Skunks, minks and desreputable blpeds are the chief enemies of the poultry raiser, and experience is likely to in the past, as a rule, largely deconvince him that a well loaded shot- termined the value of corn fodder, the gun is the best weapon to use in all time is at hand when, regardless of the

Three hundred and prove that of all the money that is fifty thousand plants are required to being expended by the federal government in any of its departments there all put in a straight line they would is none which is fetching a larger return on the investment than that disbursed by the department of agriculture. For this reason pressure should be brought to bear on our congressmen to make appropriations for this branch

VENTILATION OF BARNS.

One of the great defects these days in all large barns and many small ones which are built is the lack of good ventilating facilities. This is partly due to ignorance and partly to indifference and partly to lack of good planning. This question is claiming the attention of some of the best architects of the day. No matter how well a Mrs. Howe never has lost sight of the barn may be equipped or how perfect peculiar characteristics of the resithe sanitary conditions, it will not be dents of the Hub. a success until ventilation is under proper control. NEW 'SHORT STORIES

The Minister Ordered Beer. Dr. George D. Towne of Manchester, N. H., and the Rev. W. H. Morrison, now of Breckton, Mass., with others, made the tour of Europe together several years ago, and, according to the stories told, there was plenty doing ail the time, says the Boston Herald.

When the party was in Heidelberg, us in duty bound, they visited a beer garden to hear the music, eat a pretzel, etc., and, the better to enjoy the music and the scenery, went upon a platform in the building. When there it occurred to the minister that pos-

sibly they were intruding and the platform was reserved for the students. and he suggested as much to the doctor.

"You can find out easily enough," said Towne: "just say to the waitress. 'Sieben grosser Pilsen,' and she will tell you." So the dominie beckoned to a trim waitress and said, "Sieben

grosser Pilsen?" "Yah, meinheer," quickly responded the lass, and disappeared. In a few minutes she reappeared, bearing a waiter on which were seven huge and foaming glasses of beer. The seven tourists laughed, none louder than Mr. Morrison, and he cheerfully paid the bill, but he did not drink any of the

Anecdote of a Poetess and a Reporter Mrs. Ella Wheeler Wilcox, whose play, "Mispah," produced recently, failed to impress audiences favorably, is not wholly without appreciation of her own merits as a writer. It is related by an eyewitness that when Mrs. Wilcox was led blushing before the curtain to make a speech on the occasion of the production of her play she sought out a reporter who was While this method of crop culture has straying about behind the scenes and gave him the original manuscript of country where there is an abundant | her "impromptu" address to the audicount of the farm receipts and ex- rainfall, it does have a tremendous ence. sir!" was the haughty reply as the gifted lady strode majestically away.-New York Telegraph.

Didn't Sec the Good of It. Mrs. Julia Ward Howe, now over eighty-seven years old, retains her aptitude for the making of clever phrases. A few days ago, on her return from Baltimore, where she had been recuperating from a slight illness, Mrs. Howe was driving through one of the side streets of Boston with friends and passed the Charitable Eye and Ear infirmary. That institution does much good, and no one knows it better than Mrs. Howe, but as she looked at the building and slowly read off the name she said without the shadow of a smile, "I don't see the good of that place." "Why, what do you mean?" asked a friend in astonishment. "This," said Mrs. Howe. "I did not know there was a charitable eye or ear in Boston. So what is the use of an infirmary for them?" Though she has lived all her life in Boston,

RICHES IN THE SUNFLOWER

State Board Makes Investigation of Kansas Emblem.

F. D. Coburn, secretary of the Kansas state board of agriculture, has started to work gathering statistics and other information regarding the sunflower and during the winter will make an effort to have the two Kansas experiment stations and the agricultural college take up the culture of the sunflower, says a Topeka special dispatch to the Chicago Inter Ocean. For some time Mr. Coburn has been receiving letters and inquiries about the uses to which the sunflower can be put. If the sunflower is useful and the seeds marketable Mr. Coburn is going to learn all about it. He hopes to have the experiment stations make a series of experiments which will determine the best varieties, the means of cultivation and the method of preparing the seeds for market.

Mr. Coburn has sent out a number of inquiries and has found that the seeds produce an oil which makes the finest of vegetable soaps. The oil when properly prepared is edible and is of much the same nature as olive oil and serves the same purposes. Not very many years ago the cotton seed was considered worthless. Now the oil is one of the most valuable of food products.

The government has issued recently a bulletin regarding sunflowers and their uses, and Mr. Coburn is working to make a supplement to this bulletin, His work will be exhaustive and will embody the experiments. It has been found that the cake resulting from the extraction of the oil contains more nitrogenous matter than does a similar cake after the extraction of maize or linseed oil and is more palatable.

The government bulletin regarding the oil from sunflowers says: "The oil by reason of its palatability and sweetness is well suited to table uses and for this purpose can replace olive oil with better success than other known substitutes." It has been found that the sunflower stalks when cut up form a very nutritious forage for cattle, horses and sheep.

Mr. Coburn has several patches of sunflowers which he is watching closely. J. M. Wolff of Burlingame is growing about twenty acres of sunflowers for the seed, which he uses as feed. Last year he harvested forty-five bushels of seed from three-quarters of an acre. Kausas is the natural habitat of the plant, and it seems to grow in dry nearly as well as in wet weather and in sandy soils as well as in loam.

ROOSEVELT, JR.'S, AMBITION Would Like to Rough It With the Cowboys For Awhile.

Theodore Roosevelt, Jr., eldest son of the president, who has been hunting and fishing and camping out in the west with friends, has fallen in love with the mountains and plains of the region about Glenwood Springs, Colo., says a dispatch from that place. He says that when he gets through college he would like to come west and "rough it" for a few years.

"I have been brought up in the east, and of course I am attached to that part of the country," said the young broad spaces of the west that appeals powerfully to me. One breathes easier here than he does in the east and feels bigger and better. When I have acquired my education I should be glad to come out here and live the life my father lived, the life that developed him from a rather weak into a strong, rugged man. I should even enjoy going on the roundup and punching cows. I know a good many cow punch. ers out here, and they seem to enjoy themselves, and I am sure I should en joy myself where they are for awhile."

Value of Perforated Sails. Although the assertion recently made

by an Italian sea captain that the power of sails was increased by their being perforated was ridiculed, it has just been proved that he was right, says the Leeds Mercury. His theory was that the force of the wind cannot fairly take effect on an inflated sail because of the cushion of immovable air that fills up the hollow. To prevent the creation and presence of that cushion he pierced his sails with many holes, through which the wind blew, the balance of the air pressure striking against the canvas and exercising its full effect. Several experiments have been made on these lines, and the results are declared to have been eminently satisfactory.

Milk Fed Pumpkin,

A milk fed pumpkin is the latest development in agricultural circles, according to a special dispatch from Bloomington, Ill., to the Chicago Inter Ocean. Two pumpkins grown on the same vine were on exhibition at the Tazewell county fair. They stood side by side, but one was ten times larger than the other. The giant was given a plnt of milk per day, a hole being cut in the vine which was attached to the stem. The milk was completely absorbed overnight. The small brother attained natural growth, but the milk fed weighed 100 pounds.

Pike Memorial on Pike's Peak, Henry Russell Wray, E. E. Nichols and C. W. Sells left Maniton, Colo., recently from the summit of Pike's peak with a view to locating a suitable bowlder on which the Pike memorial tablet may be mounted during the centennial, says the Colorado Springs Telegraph. A bronze tablet similar to those to be placed on the Pike bowlder in Antiers, park is to be formally dedicated on the summit of the peak on Wednesday, Sept. 26, historical day of centennial week, and with fitting cereon the bowlder to be selected.
